

April 5, 2006

Honorable Chairman:

I humbly write this letter with the hopes that you would consider its contents as a serious concern for our nation's community.

I hope you agree that my concerns are not premature, in limiting the power we give the company Walmart by allowing them to have banks. While it may seem like a great idea, my concerns rely heavily on the dishonesty that this company uses to manage its large enterprise. While Walmart has sold their product as being the cheapest anywhere in the nation, we have seen that it has cost us a lot of money in medicaid coverage. It is also noteworthy to mention that they have side tracked the laws by hiring companies that do not practice fair labor and has often claimed ignorance by stating that these jobs are contracted out. I feel that it is important to attend this meeting in order to make an informed decision before providing so much power to this company and the Walton family.

Thank you for your time and anticipated consideration.

Sincerely

Candida Batista
